SYNTAX

CxLink for ArchiveLink

Leverage a cloud-based storage solution for your SAP document management and data archiving needs

- Maintained by Syntax and regularly updated with the latest cloud hyperscaler functionalities
- Greatly reduces database storage size, leading to significant cost savings
- Available for one- or three-year license terms

SAP Platinum Partner

SYNTAX

Overview

Every business needs to process large volumes of documents and data files to operate efficiently—with impacts on IT infrastructure costs and performance. While hosting data in the cloud can solve this problem, SAP customers often require a third-party tool to connect their data to the cloud.

Syntax CxLink for ArchiveLink seamlessly integrates with cloud storage solutions such as AWS, Microsoft Azure, and Google Cloud. This SAP-certified solution facilitates efficient storage and retrieval of documents and archives. It supports SAP ArchiveLink for both public and private cloud, including RISE with SAP, offering the most robust solution for document management and archiving.

Key Features

- Utilizes Amazon S3, Azure Blob Storage, or Google Storage as an object storage service for storing SAP documents, archives, and unstructured data
- Fully integrated with the SAP document and archive management module (GOS/DMS)
- Compatible with SAP ArchiveLink
- Comes with integrated security features:
  - HTTPS communication with SSL certificates between SAP and cloud hyperscaler
  - Encryption supported on client (SSF) and with cloud native Key Management Services (KMS)
  - IAM Policies for restricted access
- Easy add-on, deployment and integration:
  - Packaged add-on using SAP Add-On Assembly Kit

Key Benefits

- **Reduced TCO:** Storing all SAP attachments and archiving sessions in the cloud reduces database size, leading to significant cost savings
- **Zero IT footprint:** Available as an SAP add-on, it is installed in the customer's own ERP system, omitting the need for intermediate servers between SAP and cloud providers
- **Unlocking innovation:** Makes SAP data available across the business in a centralized repository, unlocking the possibility of applying new technologies, like AI, to these documents
- **Ensure security and compliance:** Fully compliant with all applicable archiving and data document retention rules and regulations
