ORACLE   +   △ SYNTAX

Engineering, Oil & Gas

Syntax helps you efficiently manage your workload, minimize risks, tackle challenges, and seize new opportunities. With global construction & engineering center of excellence will align with your strategic goals and implement technologies to enhance your operations.

Our Value Proposition

- Provide secure, integrated, and cloud-based ERP solutions that work across the project lifecycle
- Improve business planning by harnessing insights into the performance of business units
- Enhance agility and competitiveness by enabling rapid data analytics for decision making
- Improve project profitability by providing timely and accurate insights into execution and productivity issues
- Improve and streamline processes to provide high value quickly
- Establish a strong and secure foundation from which to drive growth, innovation, and profitability

Challenges

- **Rising costs and tighter margins:** Price inflation, demand fluctuations, project complexity can lead to cost overruns
- **Increased complexity:** Ineffective coordination to manage multiple stakeholders, advanced technologies, and intricate designs
- **Workforce skills gap:** Aging workforce and insufficient new talent entering the field, impacting the quality of work
- **Supply chain challenges:** Disruptions in supply chain leading to production delays and increased costs
- **Technology innovation:** Implementation costs and need for technical expertise for adoption and integration of new technologies

Benefits

- **Reduced complexity:** Focus on continuous improvement across your asset operations
- **Simplified reporting and analysis:** Improve project control and make informed decisions
- **Reduced risks:** Create a safe, sustainable, and efficient work environment
- **Amplified user experience:** Enhance satisfaction of all project stakeholders and achieve better project outcomes
- **Recruit right talent:** Attract and retain top talent to maintain quality, foster innovation, and drive success

Our Solution

Modern Data Platform

Moving to Autonomous Database
Modernization and Consolidation
OCI / Azure Mixed Workloads
Application focus gives Syntax competitive advantage

AI/GenAI Offerings

Syntax GenAI platform on Kubernetes on OCI
Augments Oracle AI capabilities.
AI Industry Workshop + Implementation
Includes OCI management and resell
Industry capabilities give Syntax an advantage

Datacenter Exit Offerings

Cloud Migration and Workload
Modernization
Advisory, Migration, and Management
VMWare Optimization / DR-as-a-Service
30+ Years in Hosting and Cloud

Estate Modernization Offerings

Modernize and Manage Applications on OCI
EBS, JD Edwards, 300+ ecosystem apps
PaaS services for OAC, OIC IAM
Syntax ERP expertise drives expanded IT use cases

Syntax Differentiators

- ✓ SMSP Commercials
- ✓ Integrated MSSP
- ✓ Industry Offerings
- ✓ CX Portal
- ✓ Orchestration
- ✓ Bundled Migration
- ✓ Focus on FinOps
- ✓ Full Stack
- ✓ Full Lifecycle

ORACLE + SYNTAX

Manufacturing & Transportation

Syntax understands the unique challenges in our core industry areas and is committed to create value for our clients. Our global manufacturing center of excellence brings together subject matter experts from across our organization to develop, build, and implement leading edge, holistic applications, technology, and data solutions

Our Value Proposition

- Implement secure, integrated, and cloud-based ERP solutions that work across the project lifecycle and promote innovation
- Implement a comprehensive managed public, private or hybrid cloud solution plan for your mission-critical applications
- Enable data analytics and IoT deployment across fleet operations and field-deployed hard assets to enhance decision making across operations
- Increase efficiency, productivity and agility across multiple processes and systems

Challenges

- **Supply chain disruptions:** Disruptions in supply chain leading to production delays and increased costs
- **Integrating supply chain data:** Need to connect operational data, from many data sources, with IT systems
- **Technology adoption:** Adopting service-based business models and software-driven products
- **Workforce skills gap:** Attracting tech-savvy talent who can automate and integrate digital systems with production work
- **Cybersecurity:** Industry 4.0 takes the approach of connecting machines to each other and business management systems via the internet, which causes security concerns

Benefits

- **Improved Efficiency:** Boost productivity by streamlining manufacturing processes
- **Scalability:** Low-cost scalability for heavy/fluctuating workloads
- **Reduced Downtime:** Predict and prevent equipment failures to minimize downtime
- **Streamlined Supply Chain Management:** Achieve seamless integration with suppliers for just-in-time production
- **Enhanced Quality Control:** Ensure product quality and compliance with industry standards

ORACLE + ▲ SYNTAX

Retail & Hospitality

Syntax understands that to respond and thrive in this ever-changing environment, companies need to be agile, embracing new technologies that enable them to cut costs, offer greater value, and live up to higher customer expectations, keeping up with industry trends.

Our Value Proposition

- Provide secure, integrated, and cloud-based ERP solutions that drive efficiencies across all aspects of operations
- Develop comprehensive managed public, private or hybrid cloud solution plans for mission-critical applications
- Increase efficiency, productivity, and agility across different processes and systems
- Enable real-time data analytics and smarter predictive analytics to enhance decision-making processes

Challenges

- **Rise of omnichannel strategies:** Price inflation, demand fluctuations, project complexity can lead to cost overruns
- **Increased expectations:** Ineffective coordination to manage multiple stakeholders, advanced technologies, and intricate designs
- **New experiential options:** Integration of experiential retail spaces and innovative payment options
- **Supply chain challenges:** Disruptions in supply chain leading to production delays and increased costs
- **Technology innovation:** Implementation costs and need for technical expertise for adoption and integration of new technologies

Benefits

- **Streamlined operations:** Boost the efficiency of retail operations and processes
- **Enhanced inventory management:** Fulfill demand flexibly across channels and optimize inventory
- **Improved customer experience:** Deliver a relevant customer experience anywhere, anytime
- **Data-driven decision making:** Analyze, plan, and optimize prices and promotions based on customer needs

ORACLE + **SYNTAX**

IT, Media & Communications

Syntax understands the unique challenges involved in the intersection of technology, content and connectivity, which requires a holistic approach. Our integrated solutions help you drive better engagement with customers, achieve scalability as the business grows, and provide a secure platform to drive sustained growth.

Our Value Proposition

- Provide secure, integrated, and cloud-based ERP solutions designed to drive innovation and enhanced customer engagement
- Develop a comprehensive approach with data-driven insights, secure platforms, and scalable solutions that cater to your evolving needs
- Increase efficiency, productivity and agility across your applicable processes and systems
- Integrated approach to connect more deeply with customers, streamline operations, and innovate continuously, driving sustained growth and success in an increasingly digital world

Challenges

- **Emerging technologies:** Keeping pace with emerging technologies and continuous need for innovation and integration with existing systems
- **Integration and interoperability:** Ensuring seamless integration and interoperability between diverse technologies and platforms to achieve a unified user experience and efficient system performance
- **Audience engagement:** Access to a wider audience and enhanced audience engagement and analytics to inform and ability to pivot quickly based on audience insights
- **Cybersecurity:** Increasingly sophisticated cyber-attacks targeting interconnected systems which leads to compromised data integrity and operational disruptions

Benefits

- **Seamless integrations:** Achieve a unified ecosystem where IT infrastructure, media content, and communication channels work together effortlessly
- **Enhanced Efficiency and Productivity:** Streamline operations and automate processes with advanced IT solutions, reducing downtime and increasing productivity
- **Robust Security:** Protect sensitive data and communications with comprehensive cybersecurity measures, ensuring privacy and compliance
- **Innovation and Scalability:** Stay ahead with emerging technologies and scalable solutions that grow with your business, adapting to changing market demands
