

SAP S/4HANA Cloud Migration Services

Maximize your ERP investment while ensuring a smooth transition

As cloud ERP is one of the most complex systems with many interdependencies and challenges, it cannot be a 'one size fits all' model. In turn, SAP offers a differentiated cloud journey to best support our diverse customer needs.

RISE with SAP journey delivers a fully managed cloud ERP experience, ideal for existing ERP customers seeking a seamless transition with SAP handling infrastructure and operations.

The Challenge

RISE with SAP journey for SAP S/4HANA Cloud ERP adoption provides a pathway for SAP customers, yet adoption is often slowed by concerns over costs, flexibility, and SAP's focus on a cloud-only innovation strategy. Despite its advantages, the move to the cloud can feel overwhelming. Some of the common concerns are:

- **Complex Landscape Analysis:** Evaluating existing infrastructure, setting priorities, and defining a migration roadmap poses significant challenges.
- **Integration of Third-party Applications:** Siloed data and potential disruptions due to integration challenges with third-party applications.

- **Disruption:** Disruption caused by migration on extended applications, platforms, and investments, and requiring skilled talent to execute it on time.
- **Technical Debt:** With legacy applications chosen not to be moved to RISE with SAP, this can delay migration plans, increase costs, and add complexities.
- **Networking and Connectivity:** Ensuring secure connectivity between RISE with SAP-hosted tenants and on-premises or customer-owned networks is often complex.

The Solution

Discover, Adopt and Optimize Your SAP Migrations in Your Way with Syntax

Syntax provides a streamlined approach and a framework - Syntax Compass - that enables organizations to navigate their ERP transformation journey. No matter where they are or how/when they want to step forward in their migration journey, Syntax can help you at each step and at every transition path.

Discover

Understanding the business benefits is crucial in the decision-making process for moving to SAP S/4HANA Cloud. It aids in defining your project scope and technology roadmap. During the 'Discover' phase, we analyze your current landscape, explore transition options and their business benefits, and provide recommendations to guide your transition. Our Power of Next Services are designed to support you in making informed decisions.

Adopt

There are a few ways to set up your SAP Cloud ERP migrations, from converting existing processes, configurations, and business data, to beginning with an entirely new system and data. While Greenfield implementations are fresh systems, starting from scratch in a new platform, it can be complex for many and not the right choice. Hence enterprises need to evaluate different migration strategies.

Optimize

We function as an extension of your Center of Excellence (CoE), offering the necessary talent, technology, process, and governance flexibility

"At Cirque du Soleil, innovation drives artistry both on and off the stage. During a transformative chapter in our 40-year journey, we partnered with Syntax to seamlessly transition to RISE with SAP S/4HANA Cloud, enabling a fully integrated cloud architecture."

in a personalized manner to achieve your business imperatives, enhance SAP's solution performance and adoption. We empower your CoE by proactively identifying and implementing value-added enhancements and innovations, ensuring continuous availability, usage, and adoption of mission-critical applications, both SAP and non-SAP.

We support your RISE with SAP environment with the following:

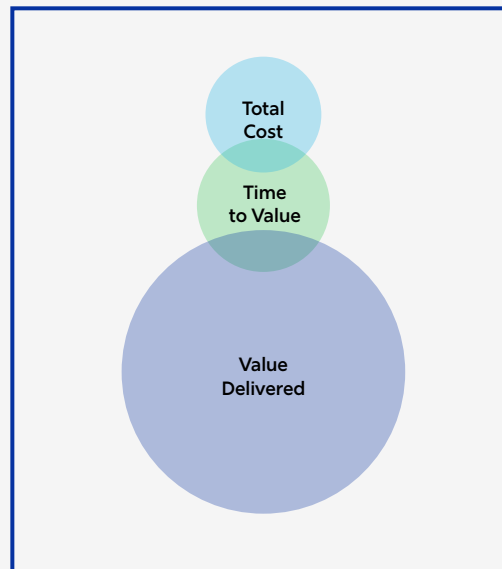

- Cover end to end application management and support for RISE with SAP applications
- Full support for hybrid hosted SAP environments in RISE with SAP, SAP Cloud solution and on-premises or hyperscaler deployments
- Complete landscape, architecture, and release management planning and advisory
- Manage critical ongoing basis and technical tasks not covered by the RISE with SAP support model
- Provides technical support and co-ordination with SAP service desk for issues and service requests

Migration Methodologies

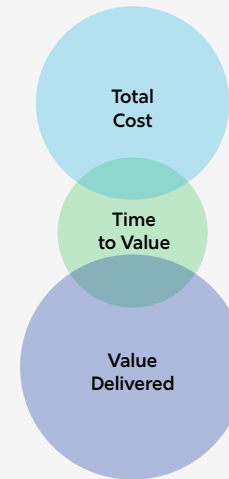

Brownfield Migration

It builds upon existing infrastructure and data, reducing disruption and enabling a smoother transition to the new SAP S/4HANA environment, prioritizing continuity and risk mitigation.

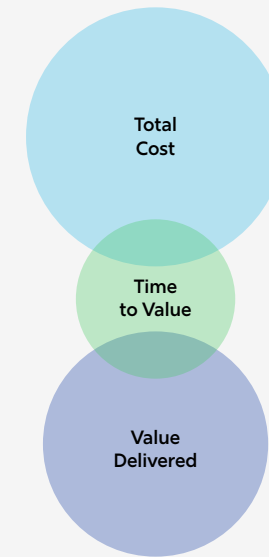

Syntax Purplefield Migration

Taking a balanced approach, it assists customers in identifying and bringing process improvement and optimization to their current SAP ECC installation, and prepare for the quick upgrade to SAP S/4HANA.

Greenfield Migration

Suitable for organizations seeking radical transformation, it involves implementing a new system in a completely fresh environment without any constraints from existing systems or processes.

Selective Data Transition

It allows for the selective re-engineering of processes and via use of software tools, the transfer of clean, useful data, making it an agile option for businesses seeking flexibility and innovation without starting from zero.

The Syntax Advantage

With extensive experience in SAP migrations, Syntax provides end-to-end support from planning to optimization, using cutting-edge technology to enhance efficiency and reduce risks. Our customized solutions align with your strategic goals, offering seamless integration with existing systems to minimize disruptions.

Get Started Today

Get started with an industry-tuned complementary workshop. During this workshop, offered at no cost, our experts will meet your team on-site and deep dive into your current SAP landscape, determine potential ROI, and help start mapping the journey to SAP S/4HANA Cloud ERP. Further explore our

incentive program for ERP Modernization that delivers qualified customers a (near) zero-cost consulting engagement and deployment on their cloud of choice. This means they can save tremendous costs, maximizing their ROI and accelerating their SAP S/4HANA Cloud ERP journey.
