

Syntax VMware Optimization Accelerator

Effortless Cloud Migration with Oracle Cloud VMware Solution Powered by Syntax

Oracle Cloud VMware Solution (OCVS) overview

In the wake of Broadcom's acquisition of VMware, many customers are grappling with increased unexpected costs, diminished support quality, and disruptive licensing changes. These challenges have created significant uncertainty and operational hurdles that are tough to navigate. Migrating to OCVS powered by Oracle Cloud Infrastructure (OCI) offers a compelling solution, providing cost-effective, scalable, and secure cloud services that

can alleviate these issues. OCI's robust support, flexible pricing models, and advanced security features ensure a seamless transition, empowering businesses to maintain their competitive edge and streamline their IT operations.

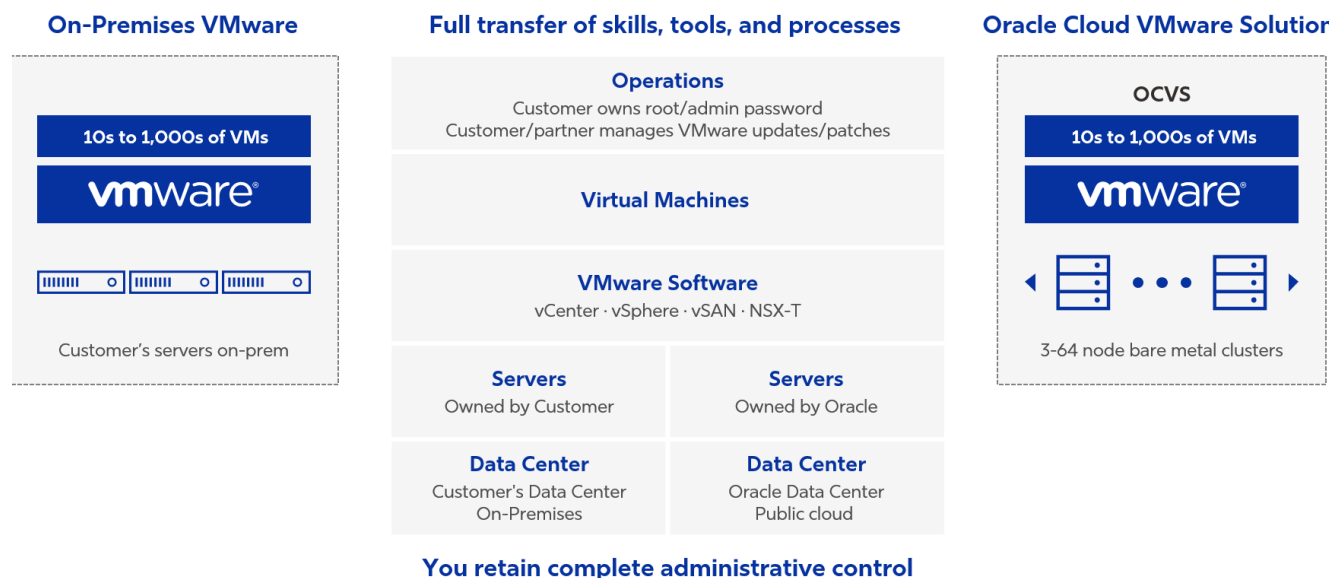

Our experts at Syntax have deep experience migrating and managing large-scale, mission-critical workloads powered by VMware hypervisor platforms. We demystify the complexity of options available on OCI and enable you with the best solution for your business.

The only public cloud option for VMware rehosting providing complete control while adding scalability, performance, and security capability

OCVS is the perfect platform to rehost your VMware estate to take advantage of the better price and performance, and the greater scalability than other hyperscaler cloud providers with no restrictions on cloud consumption or service availability. Simply put, rehosting your VMware implementation on OCI provides the fastest path to lowering costs and improving performance and security.

The key value that Syntax delivers for your VMware investment is helping you understand your options, delivering a blueprint to move forward and optimize your Total Cost of Ownership (TCO) of your VMware investment rapidly with ease.

Syntax leverages best-of-breed tools and decades of cloud migration experience to ensure seamless cloud migrations while modernizing your infrastructure service needs with optimized TCO.

Why Customers Choose OCVS & Syntax Managed Services

Full Control, Fully Dedicated

Syntax fully managed using the same high standards as our own cloud.

Lower Price, Lower TCO

Lowest price per Core, per GB RAM, per TB storage in the market.

Faster Migration, Lower Risk

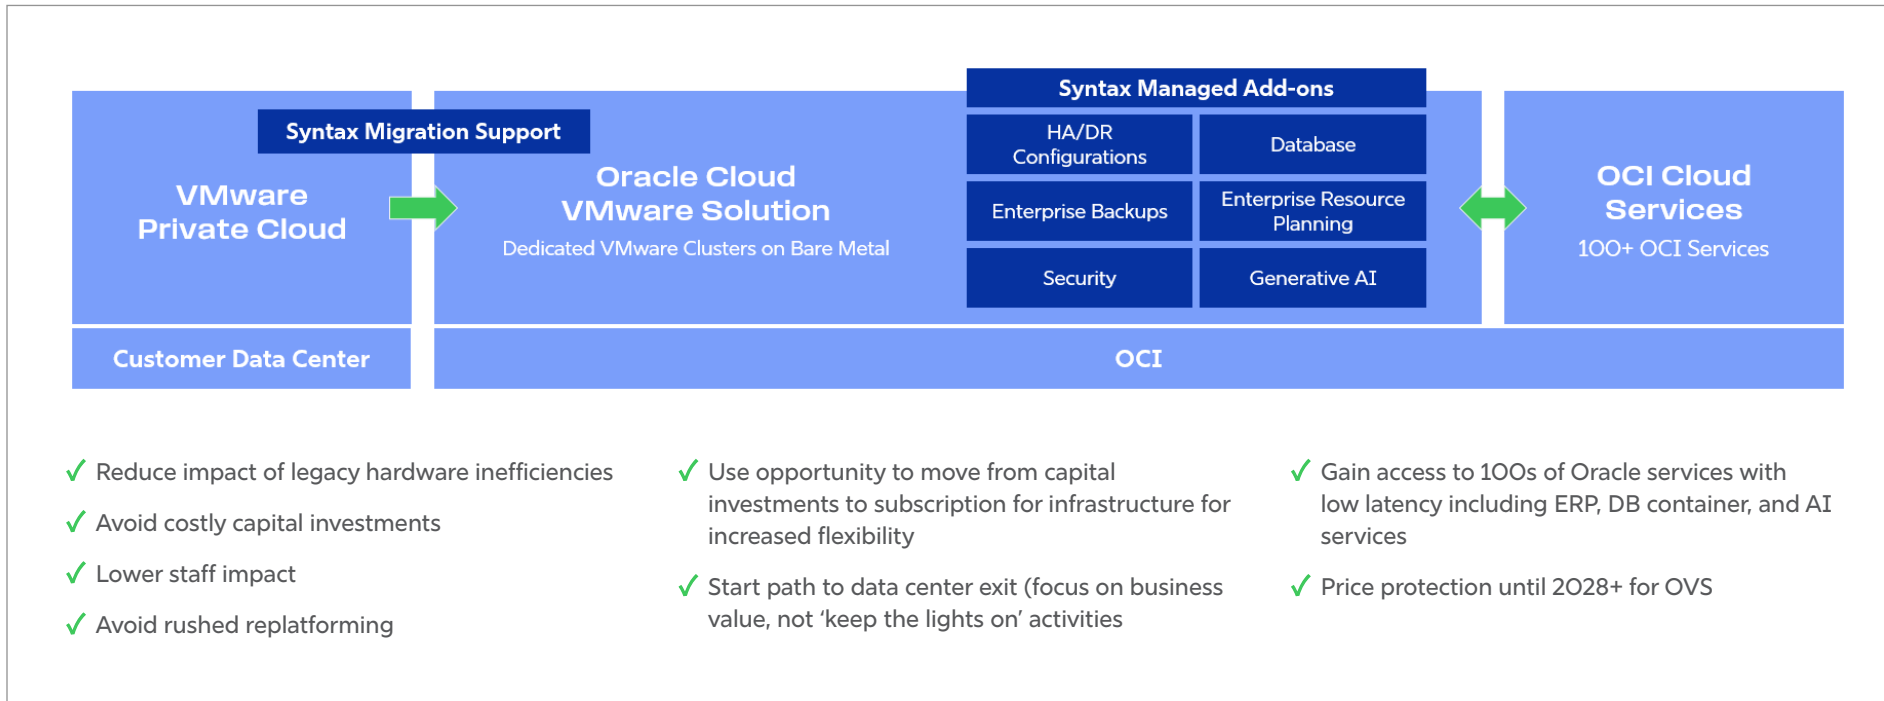

Migrate VMs as-is and as-a-whole with ZERO application changes.

Modernize with Oracle Cloud Services

Deploy VMs with ExaCS, RAC DB, Autonomous Database-access ALL OCI services.

Deploy Globally

48 cloud regions around the globe or in a dedicated region, or sovereign region. Same pricing!

Get Started Today

The Syntax VMware Optimization Accelerator modernizes your cloud journey. Take advantage of our comprehensive migration and managed services incentives.

Key features of the Syntax-powered Oracle Support Rewards

- VMware to OCVS assessment including license impact analysis
- Syntax award-winning 24x7 Technical Managed Services – Flexible and scalable

- EBS ELP report (if applicable)
- OCI billing management and discounts
- White-glove migration and onboarding services
- Annual management contract provides:
 - SLA-backed service monitoring, security, performance and availability management, and configuration management
 - Customer success manager and technical account manager support
- Earn OCI Support Rewards through Syntax – helps reduce Oracle software license support costs

Up to \$50k Acceleration funding available from Syntax for qualified projects (conditions apply) for the following:

- Design and license impact workshop
- Migration services
- Monthly OCI cloud fees
- Syntax complete monthly Managed Services fee
