

# Syntax services for IBM i (AS/400)

Modernize and manage your IBM i (AS/400) system with confidence, whether on-premises or in the cloud.

- Maximize performance and efficiency
- Simplify operations and quickly resolve issues
- Reduce infrastructure costs

## Overview

For decades, IBM i (AS/400) has served as a trusted foundation for mission-critical operations. As cloud computing, AI, and agile methodologies continue to transform the IT landscape, organizations are seeking ways to extend and complement the strengths of IBM i with scalable and innovative technologies.

Syntax helps transform your IBM i environment with automation-driven solutions across AWS, Azure, OCI, and Syntax's enterprise data centers. Our services are tailored to IBM i customers—from remote management and cloud hosting to IT assessments, development, and managed services. Whether maintaining on-premises deployments or migrating to the cloud, Syntax ensures secure, seamless modernization while maximizing your investment.

## Services

Syntax services for IBM i (AS/400) include:

- **IBM i development services (RPG / RPGLE, COBOL, CL)**
- **IBM i managed services**
- **IBM i cloud hosting services**

We assess your current setup and provide a detailed plan, implementation, and support:

### Discovery and assessment

- Assess existing IBM i (AS/400) infrastructure, applications, and integrations
- Perform gap analysis and identify opportunities for modernization

### Solution design and roadmap

- Tailor solutions for cloud migration and application modernization
- Provide cost estimates, timeframes, resource plan, and ROI analysis

### Implementation and ongoing support

- Execute phased project, introduce new tools and technologies, and provide training
- Deliver ongoing support with periodic reporting on performance, service levels, etc.

## Benefits

- **Global support model:** Delivers consistent, 24/7 support across all regions to ensure seamless operations and rapid issue resolution
- **Performance-optimized platform:** Leverages advanced infrastructure to maximize application performance and efficiency
- **Flexible and scalable cloud options:** Offers customizable cloud solutions that adapt to your evolving business needs
- **Reliable business continuity and data protection:** Ensures uninterrupted operations with robust disaster recovery and data security measures
- **Superior customer experience:** Provides responsive, personalized service that aligns with your business goals
- **Extensive IBM i (AS/400) expertise:** Takes advantage of deep IBM i knowledge to efficiently manage, modernize, and migrate your legacy systems
