Additional Licenses required

The next level User experience

With our Approval Template, companies can quickly mature their approval workflows by leveraging Microsoft Standard solutions with a focus on Microsoft Teams. This template has been successfully rolled out for multiple LoB's, like Purchasing, Finance & Controlling and even HR.

Technologies / Solutions in Use

Microsoft PowerApps

Microsoft Dataverse for Teams

Microsoft Power Automate

SAP S/4HANA; SAP ECC

Feature Overview

- **Dataverse for Teams** allows a full integration of the solution into your daily work
- **Leveraging the out of the box Approval activity** enabling users to approve requests from everywhere, via phone, outlook, teams app or Power Automate App.
- **Flexible Workflow handling** to reduce waiting cycles, enabling users to set OOO times, delegates and even to reassign specific, or all pending approvals
- **Template approach** allows for full customizing according to your needs, with the full flexibility of Power Apps
- **Flexible Workflow adjustments** allows admins to change workflows directly within the App.
- **Extensive Admin capabilities** enables for a log review, reassignment of workflows and much more
- **SAP ERP integration** to ensure data consistency and reduce additional workload, e.g. for WBS element creation
- **Scalability** – Can be enhanced by multiple approvals scenarios, creating a seamless approval experience for all employees

Solution Benefits

Based on Dataverse for teams for a quick start and infinite scalability options

Fully adjustable to your business scenario, thanks to Low-Code and our template approach

Approve from everywhere, every time

Save time and money by reducing approval cycle times

Still not convinced?

Try our Assessment

Our solution template for Approval scenarios provides a ready-to-use solution. In this assessment we evaluate your Approval processes and provide an implementation estimate.
