

Syntax Project Change Order Management

Improve claims support and revenue capture with effective change management

- Provides a streamlined approach to handling modifications in project scope
- Empowers users to efficiently and proactively identify, track, and document project-level deviations
- Mitigates risks and enhances project success

Overview

Project changes are all too common in the construction industry. Whether due to client requests, unforeseen circumstances, or other factors, each change can impact project requirements. But ineffective change management processes can lead to unidentified or unsupported claims and lost revenue on client projects.

Syntax Project Change Order Management is tailored to meet the dynamic needs of construction projects, ensuring efficient management of scope changes from inception to completion. By integrating seamless change control and enhancing project visibility, we empower organizations to navigate complexities and achieve project success confidently.

Features

- **Integrated Change Control with S/4 Projects:** Initiates S/4 linked change notifications with minimal user input. Progresses changes through enrichment and status updates until final approval as a change order, enhancing project data integrity.
- **Project Management Oversight:** Provides a dashboard for comprehensive oversight, enabling stakeholders to monitor change details and status effectively throughout the project lifecycle.
- **Document Management Integration:** Connects to preferred cloud-based change document repositories. Ensures all change artifacts are securely stored and linked to relevant records for immediate access and visibility.

Benefits

- **Early Identification of Change Impacts:** Proactively identifying and incorporating changes minimizes their impact and costs.
- **Improved Project Visibility:** Detailed reporting offers clear insights to capture, complete, and bill all deviations within contract timelines, enhancing transparency and accountability.
- **Enhanced Efficiency and Productivity:** Facilitates collaborative change management, reducing delays and errors to optimize project workflows and productivity.
- **Improved Revenue Recovery:** Smooth handling of change orders improves customer communication and ensures effective claims management for revenue recovery.
