

Syntax VMware Modernization Services for Microsoft Azure

Maximize ROI, improve performance, reduce time to market, and drive business growth.

- Eliminate financial risks and uncertainty due to Broadcom licensing changes
- Complete your migration quickly and cost-effectively with a roadmap and execution plan
- Enhance performance and right-size your workloads

Contact us today to learn about Azure migration and modernization opportunities through a VMware Rapid Impact Assessment ►

Overview

Your VMware strategy is challenged by licensing complexity, cost increases, and roadmap uncertainty. Syntax has the expertise to help you navigate the optimum path to meet your business needs. As a Microsoft Azure Solution Partner and CSP Reseller with years of VMware experience, Syntax can lead your VMware-based migration while mitigating your financial risks from the Broadcom acquisition.

Syntax will tailor a migration, optimization, and operations strategy to your environment that delivers improved capability and cost savings for your VMware transition to Microsoft Azure. Our proven assessment methodologies range from a two-week Rapid Assessment to a comprehensive Modernization Assessment, offering actionable recommendations for your transition. With a full-stack, 360-degree approach, Syntax evaluates your network, compute, storage, databases, licensing, applications, and workloads to create a modernization roadmap plan backed by 50+ years of industry experience..

Syntax Service Deliverables

- **Optimization and licensing assessment** to optimize your on-premises and cloud environments, reduce required instances, and enhance resource efficiency.
- **Modernization analysis** that accelerates Microsoft Azure migration and cost reduction, including securing applicable funding and Microsoft support for assessments, architectural reviews, migrations, and modernization.
- **Current and future workload planning**, including performance profiling, contractual dependency reviews, and optimization strategies.
- **Right-sizing recommendations** to optimize workloads for performance and cost efficiency.
- **High-level migration roadmap development** tailored to the Microsoft Azure platform.
- **Additional modernization assessments** for operating systems and applications, identifying paths to cloud-native services for greater agility.

Benefits

- **Rapid Planning** – Quickly receive a migration roadmap and execution plan, ready to present to stakeholders.
- **Improved TCO** – Lower total cost of ownership by moving to scalable cloud-native solutions and optimizing existing workloads.
- **Future-Ready Architecture** – Leverage cloud-native services to replace legacy on-premises software and prepare for long-term growth.
- **Minimal IT Disruption** – Initial discovery requires little involvement from your IT team, keeping them focused on core responsibilities.
- **Business-Aligned Planning** – Collaborative approach ensures IT and business priorities stay aligned with your calendar and goal.
