

Connect SAP Cloud ERP to your AWS
using standard Content Management
Interoperability Services (CMIS).

- Archive SAP documents directly in AWS
- Deploy on SAP BTP with no custom development
- Centralize cloud document storage for auditing and compliance

Overview

SAP customers increasingly need to store and archive documents in the cloud, but connecting SAP Cloud ERP to AWS cloud storage has traditionally meant custom development or proprietary connectors. That adds cost, complexity, and long-term maintenance, and it can lock organizations into tooling that is hard to scale or support as document volumes and compliance demands grow.

Syntax CxLink for CMIS directly connects SAP Cloud ERP with your AWS through a CMIS server deployed on SAP BTP (Business Technology Platform). SAP documents can be stored and retrieved in cloud without additional development or proprietary connectors. The result is a simple, secure, standards-based path from SAP to the cloud.

Features

- Connection through CMIS and REST services from SAP to the CMIS server on SAP BTP
- Storage and retrieval of SAP documents (PDF, XML, images, etc.)
- Standards-based integration with no proprietary connectors or custom development
- Integration with SAP DMS and support for standard document objects
- Version control and basic metadata management handled by SAP BTP
- Authentication and access control managed through SAP BTP and your Cloud, with full access traceability
- Encryption in transit (TLS)
- Retention and lifecycle policies for archived documents
- SAP ArchiveLink support for content repository registration
- Compatible with SAP Cloud ERP and SAP Cloud ERP Private

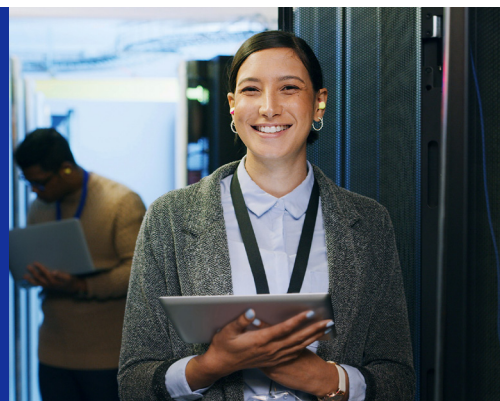

Benefits

- **Direct SAP Cloud Integration:** Secure and standardized connection between SAP Cloud ERP and AWS through SAP BTP
- **Cloud-Native Architecture:** Compatible with both public cloud and private cloud environments
- **Simple Configuration:** Implemented using standard SAP parameters; no external components required
- **Scalability and Performance:** Leverages SAP BTP infrastructure and Cloud distributed storage
- **Security and Control:** Maintains complete traceability over document access, with permissions enforced consistently across SAP and Cloud

About Syntax

Syntax is a leading global technology solutions provider driving enterprise transformation in the cloud. We help organizations modernize mission-critical applications through AI-enabled innovation, industry-tailored outcomes, and end-to-end solutions across strategic advisory, implementation, and managed services. Through our Boutique @ Scale approach, we tailor every engagement to our customers' priorities, blending boutique-level agility and care with the reach and resilience of a global enterprise. Supported by strategic partnerships with SAP and other technology leaders, we empower customers to scale faster, work smarter, and build for what's next.
