

Syntax AI CodeGenie Suite

Move to SAP Cloud ERP Faster, with Less Risk

Agentic AI built to accelerate every stage
of your SAP transformation

Years of accumulated custom code and undocumented configuration decisions turn SAP migrations into projects that are tough to scope and tougher to forecast. The **Syntax AI CodeGenie Suite** transforms how your SAP Cloud ERP project is delivered, pairing proven SAP expertise with a purpose-built agentic AI workflow that automates the hardest steps. The result: you move faster, with less risk, and stay fully aligned with SAP clean core best practices.

The Custom Code Problem: Why SAP Migrations Stall

Most SAP customers rely on custom code and complex system configurations to run core business processes—and that accumulated complexity is what makes migrations so hard to manage and predict, and so easy to underestimate.

► **Missing Documentation**

Undocumented custom code and configurations create risk and technical debt that complicate every migration decision.

► **Manual Effort and Cost**

Documenting and reviewing legacy code and configuration by hand is slow, expensive, and hard to keep current.

► **Knowledge Loss**

Critical know-how disappears when the experts who built and maintained your SAP systems become unavailable.

► **Clean Core Uncertainty**

Without clear visibility into custom code and configuration, aligning to SAP clean core becomes guesswork.

67%

of SAP customers rely on custom code to run their operations, making the transition to a clean core a significant challenge.

The Workflow:

An End-to-End Path to SAP Cloud ERP

The CodeGenie Suite accelerates the path to SAP Cloud ERP, from analyzing legacy code and configuration to writing clean core-compliant code and the documentation that supports it. Together, this delivers an end-to-end agentic AI workflow that reduces risk, cuts delivery time, and keeps every output aligned with SAP clean core best practices.

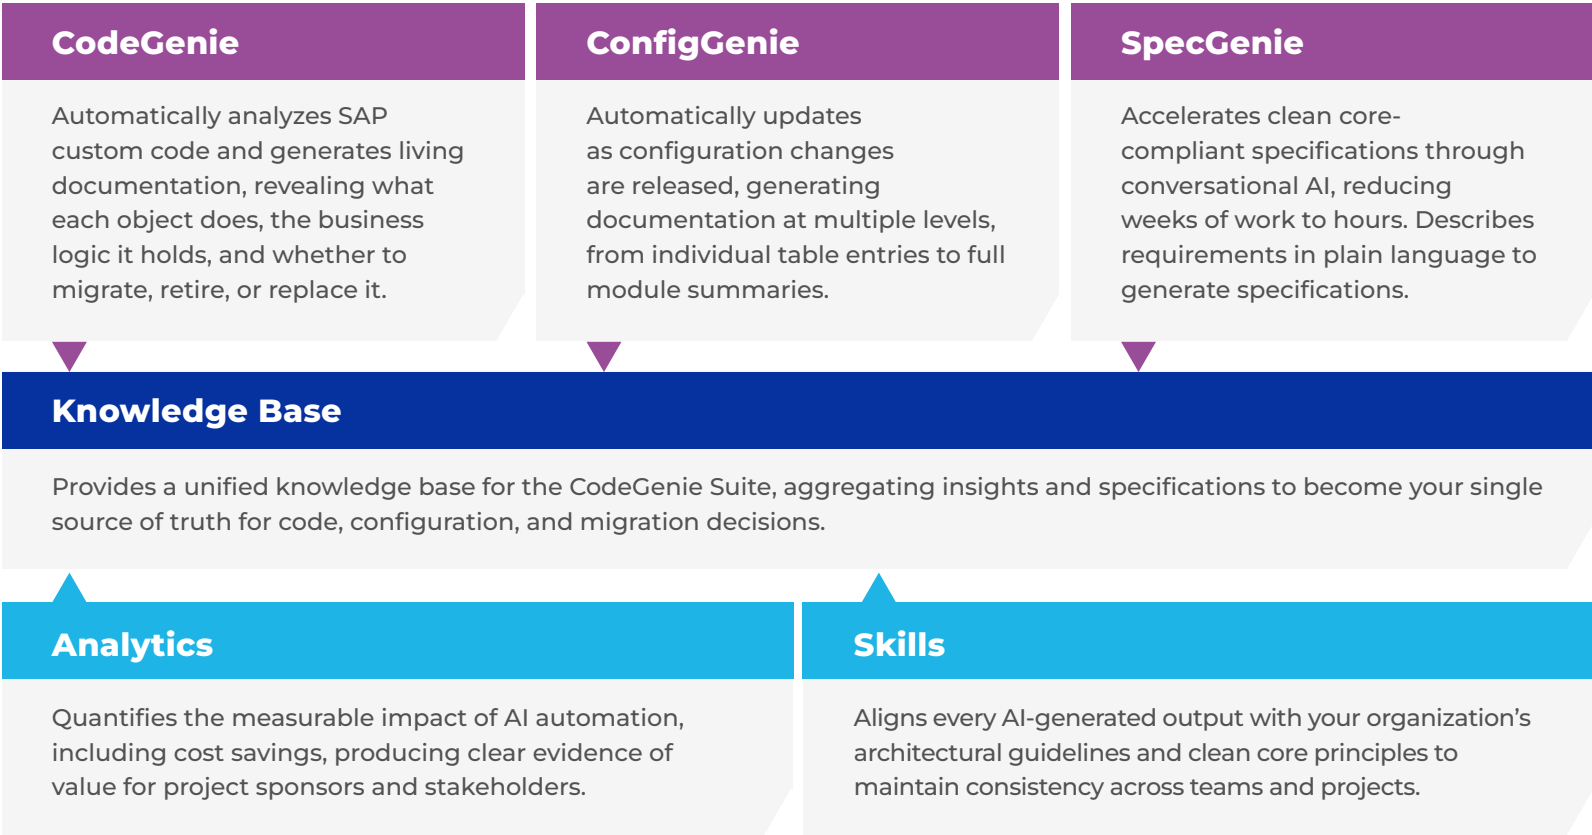

CodeGenie Suite Migration Workflow

The Architecture: Six Components, One Intelligent Suite

Six integrated components power the CodeGenie Suite: CodeGenie and ConfigGenie document your existing SAP environment, SpecGenie turns that into clean core-compliant specifications, and shared Knowledge Base, Analytics, and Skills govern every output, all running securely on SAP Business Technology Platform (BTP).

Syntax AI CodeGenie Suite

The Payoff: Faster Migrations, Knowledge that Grows

► Rely on Real Delivery Expertise

Built by the teams delivering daily SAP transformations, the CodeGenie Suite is trained on real patterns and calibrated by consultants who understand your business.

► Put Purpose-Built Agentic AI to Work

Agents analyze, write, and validate code and documentation end-to-end. Each feeds a shared Knowledge Base, so what's learned on one project carries into the next.

► Preserve Critical Knowledge

Institutional know-how stays inside your business, even as experts change roles or move on.

► Accelerate Modernization

Automated analysis and documentation compress the slowest phases of your SAP transformation, getting you to your target system sooner.

► Respond in Seconds

Teams query custom code and configuration in plain language instead of hunting through systems and transport requests.

► Stay in Control of Your Data

Everything runs securely within your SAP environment, with nothing leaving your system.

► Trust Your Documentation

Records stay accurate automatically, removing manual upkeep and the risk of decisions based on outdated information.

► Meet SAP Standards

The CodeGenie Suite is annually re-certified by SAP, confirming that every output meets SAP Best Practice and security standards.

About Syntax

Syntax is a leading global technology solutions provider driving enterprise transformation in the cloud. We help organizations modernize mission-critical applications through AI-enabled innovation, industry-tailored outcomes, and end-to-end solutions across strategic advisory, implementation, and managed services. Through our Boutique @ Scale approach, we tailor every engagement to our customers' priorities, blending boutique-level agility and care with the reach and resilience of a global enterprise. Supported by strategic partnerships with SAP and other technology leaders, we empower customers to scale faster, work smarter, and build for what's next.
